Department of Transportation (DOT) Exams

The Federal Motor Carrier Safety Administration (FMSCA) now requires all medical examiners to be trained and certified in physical qualification standards. All Commercial Motor Vehicle (CMV) drivers must be examined by a certified Medical Examiner who has completed FMCSA training. All drivers regulated by the DOT/CMV standards are required to have a valid medical certificate signed by a Certified Medical Examiner.

Our office can help! We have certified medical examiners (CMEs) that can perform health screenings and physicals required by the Department of Transportation. We are specially trained and listed on the Federal Motor Carrier Safety Administration National Registry.

Medical Director of Occupational Health Services Dr. Andrey Sayko and Nurse Practitioner Paulette Remijan can perform physical exams for local businesses large and small that require a DOT medical exam to operate machinery or perform specific job duties.

Being a certified medical examiner means we are held to the highest standards in healthcare. Our job is to ensure drivers are physically and mentally fit to safely operate a commercial vehicle.

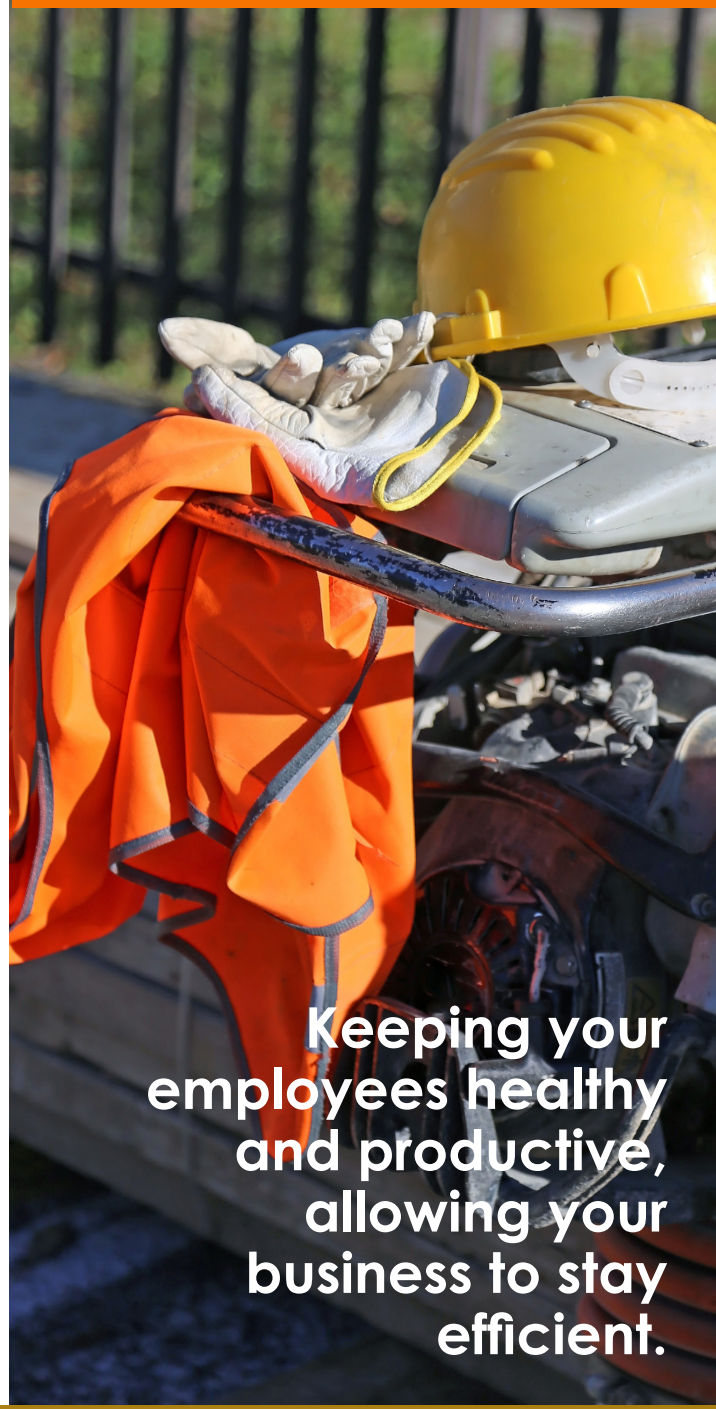
COMPRECARE/OCCUPATIONAL HEALTH SERVICES



Who We Are

The Harrington Occupational Health Department provides services to a variety of clients through pre-placement and periodic physical examinations/screenings, evaluation and treatment of work-related injuries, medical surveillance screenings, immunizations, wellness/safety education and worksite evaluations.

Services are provided on a contract basis, and allow employers to provide employees with overall health and wellness in the workplace.

Services such as DOT exams and immunizations are also offered on a fee-for-service basis.

Give your organization the professional and clinical expertise required to:

- Promote a safe and healthy work environment
- Meet the identified and prospective needs of new and existing employees
- Help you comply with Federal and State regulations specific to your industry/business
- Improve overall employee health and safety awareness through programs such as health promotion and onsite immunizations
- Decrease workers compensation claims by performing onsite ergonomic evaluations, baseline and annual pulmonary function and audiometric testing

Programs include but are not limited to:

- Pre-placement/Post-job offer screenings
- DOT and medical surveillance physical examinations
- Drug and alcohol testing
- On-site flu immunizations
- On-site pulmonary function and respirator fit testing
- On-site audiometric testing and hearing conservation training
- Immunizations and TB skin testing specific for employment; in-office or on-site
- Laboratory testing and diagnostic imaging for medical surveillance
- Workplace ergonomic evaluations
- Workplace safety
- Work-related injury assessment, treatment and management
