Care with Comfort and Convenience

Having an MRI doesn't have to be a frightening experience.

Harrington has our patients' safety and comfort in mind — that's why we are proud to incorporate a state-of-the-art, high performance MRI to our Harrington HealthCare at Charlton location.

Shaped like a big doughnut, an MRI uses magnetic fields and computers to produce detailed pictures of internal organs, soft tissues, and bones that allow radiologists to diagnose medical problems.

Why A *Siemens Avanto* MRI?

- High resolution technology
- Shortened exam time
- High level of comfort
- 30% reduction in noise

A Partnership in Health

The addition of the Siemens Avanto MRI in Charlton is a unique venture between Harrington Hospital and Beth Israel Radiologic Foundation. Your MRI scans will be read by Radiologists from Harvard Medical Faculty Physicians.

The Siemens Avanto MRI is operated by skilled Harrington technologists, with the site's daily operations run by our top administration and management.

A Goal to Expand Care in our Location

Our 1,600-square-foot MRI operation is located within a spacious medical building at the junctions of Route 20 and North Main Street in Charlton. Coined

Harrington HealthCare at Charlton, our newest outpatient facility houses a full line of diagnostic imaging — including digital mammography — laboratory services, a Wound Care Center and physical therapy, as well as primary care and special physicians.

What our MRIs Can Do!

Scan From Head to Toe:

With our equipment's flexibility, any area of the body can be seen with the most exact details—it's even precise enough to identify tiny vessels!

Diagnose Faster:

Our MRIs make it easy to rapidly diagnose diverse conditions such as acute stroke, disc herniation, liver cancer or a torn ligament.

Create a Comfortable Atmosphere:

The table is low to the floor to make it accessible to most patients. You can listen to your own music while you rest comfortably during your MRI exam!
