

## Occupational Therapy

Whether you're recovering from surgery, a stroke or other medical condition, Occupational Therapy (OT) works to improve balance and strength, using adaptive equipment and structured exercises, as well as upper extremity splinting.

OT focuses on the upper extremity and day-to-day functional treatment programs, such as lateral/medial epicondylitis, wrist fractures, carpal tunnel and dequervains.

## Speech Therapy

Speech-language and swallowing therapy is the health-care profession that studies disorders of human communication and swallowing for people of all ages. Our services include evaluation and treatment of:

Childhood language delays/disorders  
Neurologically-based communication disorders  
Adult speech disorders

Cognitive aspects of communication • Voice disorders  
Neuromuscular oral-face impairment • Swallowing disorders

## Audiology

The Audiologist at Harrington provides the highest quality hearing assessment and hearing rehabilitative services for both children and adults. We take pride in offering state of the art hearing products and services providing the best individualized hearing care possible.

Your audiologist will provide you with a hearing assessment and determine your need for hearing aids or referral for medical management.
