About Your Hearing

Why is it important to test your hearing?

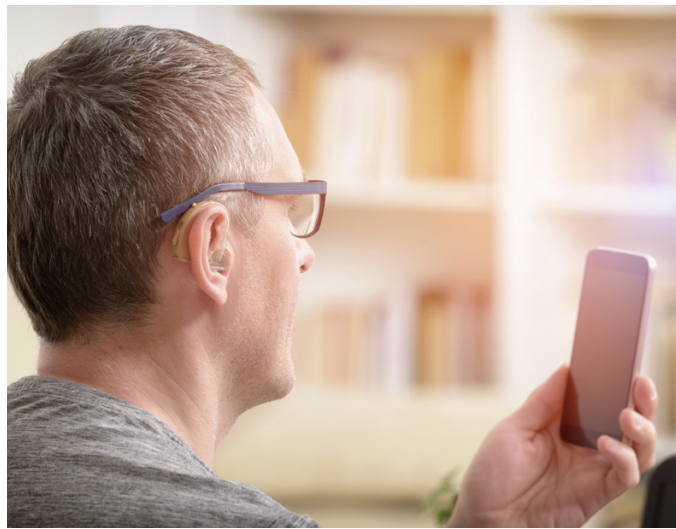

Hearing loss that is not treated may cause feelings of frustration, confusion or loneliness. It is estimated 48 million Americans have a significant hearing loss.

How do I know if I have hearing loss?

- Do you have difficulty hearing or understanding speech?
- Do you have difficulty following conversations?
- Do you have ringing in one or both of your ears?

Risk Factors for Hearing Loss:

Diabetes | Obesity
Cerebravascular Disorders | Hypertension
Cardiovascular Disorders | Otoxicity

Today's selection of hearing aids is diverse, with more and more manufacturers designing innovative, sleek and barely-noticeable devices.

Aids are classified as in-the-ear (ITE) and behind-the-ear (BTE) and offer high quality sound and a flexible range of features.

Let our Hearing Aid Specialists help you find the best fit for your lifestyle!

Our State-of-the-Art Hearing Aid Demonstration Room

Our state-of-the-art Hearing Aid Demonstration room features:

- Wireless hearing aids
- Assistive listening devices
- Television compatible accessories
- Captioned telephones

Hearing aids with Bluetooth capability are made to allow you to stream audio directly into your hearing aids from your phone, computer, and TV.
