

Nutrition Support

A big part of managing diabetes is adapting your lifestyle with a proper diet. Our **Nutrition Services Department** offers counseling and a plan specifically tailored to your needs. We:

- Help you to better understand the basics of nutrition including how calories, carbohydrates, protein and fat impact your weight, disease process and overall health;
- Provide education on carbohydrate counting and label reading;
- Provide advice for meal planning, grocery shopping and incorporating nutrient-dense foods into your daily routine ;
- Help you to set realistic, manageable goals;
- Provide follow-up counseling sessions for continuous improvement or maintenance.

DIABETES MANAGEMENT

Living with

Diabetes

just got easier with Harrington.

Diabetes Management
Endocrinology Care
128 Main Street, Suite 2
Sturbridge, MA 01566

508-347-7585

In 2012, there were 29.1 million Americans diagnosed with diabetes.

Diabetes is prevalent in seniors, affecting nearly 12 million people in America.

More than 200,000 Americans under the age of 20 are estimated to have diabetes.

* National Diabetes Statistics Report, 2014

You Can Manage Your Diabetes.

Even though diabetes is a serious disease, it can be managed with proper care, nutrition, exercise and specialists who help plan for your success.

At Harrington, give you the tools you need to control the disease and lower the risk of developing complications.

Know Your Risks.

Taking control of your diabetes is an important step in maintaining your health and wellness for years to come.

Undiagnosed or poorly-managed diabetes can result in serious complications, including:

- **Skin** - including bacterial infections and itching.
- **Vision** - including an increased risk of glaucoma, cataracts, and retina disorders. Diabetes is a leading cause of blindness.
- **Neuropathy** (Nerve Damage)
- **Foot ulcers and amputations**
- **Kidney disease** - Diabetes is the leading cause of kidney failure.
